Updated by Beloved Babaji on 08 September 2020

I AM Babaji.

Today, I have come to give some additional information on the Teaching on labour. You know that the right work is work for the benefit of the Living Life. But now, I will add one more element that makes labour right from the Divine and the Lord's point of view – the work for the benefit of the Living Life should be performed in a state of highest Joy and in the presence of Divine Love.

Only if you are feeling joyous while working, only if you think positively and say good words while working, only then your work becomes creative, and its result is the growth of your Soul and creation of a Divine pattern in your material world.

This is what you should strive for.

When the Soul works in the Higher etheric octaves of Light, it does so with inspiration and with a blessing. You can do the same.

You can thank God for giving you His Permission to come in that incarnation and to give the best of yourself through your work in the material world.

Before you start to do anything, you can ask for the support and help of the Higher Beings of Light in order to get their blessing and to fill up your being with Divine inspiration. Then, the inhabitants of the Light network from the more subtle layers of Existence can take part in the process of your work, and this will lead to Unification, which is a characteristic feature of the New World of the 6th and the 7th race.

You can bless the subject of your work as well – the thing you are doing, to fill it with positivity and with your Divine Love and thus to bring them to all the people who will be in touch with the fruits of your work.

Everything that I am saying to you is absolutely realistically achievable for every one of you as long as you want that and you are determined to that way of working. Thus, you will lay the foundations of the new relationships with each other and with the Higher Beings of Light.

Each type of work that is carried out in compliance with the Divine Commandments and Laws, whatever that work is, could be saturated with Joy. The same Joy that the children experience when they work. Take your time and watch children, what they do, and the happiness they radiate while working and playing.

That is the right labour, and then it has been done to serve the Living Life.

I wish you success in achieving that labour.

I AM Babaji
